

ForestGuard AI - Analysis Report

AI-Powered Forest Monitoring & Risk Detection System

Region Information

Region: Kanha Test Block
Risk Level: Medium
Confidence Score: 60.0%
NDVI: 0.400
Vegetation Loss: 20.0%
Risk Score: 0.60
Generated: 1/8/2026, 1:11:19 am

Analysis Information

Detection Method: fallback
Processing Time: 1.63 seconds
Satellite Source: Mock Satellite Generator

Gemini AI Risk Explanation

Automated assessment classified this region as Medium risk from a mean NDVI of 0.4 and an estimated 20% vegetation loss. Generated without AI narration.

Recommended Actions

1. Continue frequent satellite monitoring.
2. Schedule another AI analysis during the next monitoring cycle.
3. Review vegetation change patterns.
4. Prepare forest officials for possible intervention if risk increases.
