

# ForestGuard AI - Analysis Report

AI-Powered Forest Monitoring & Risk Detection System

## Region Information

Region: Kanha Test Block  
Risk Level: Medium  
Confidence Score: 100.0%  
NDVI: 0.490  
Vegetation Loss: 11.0%  
Risk Score: 0.51  
Generated: 1/8/2026, 7:31:39 pm

## Analysis Information

Detection Method: ml  
Processing Time: 1.31 seconds  
Satellite Source: Fallback

## Gemini AI Risk Explanation

Automated assessment classified this region as Medium risk from a mean NDVI of 0.49 and an estimated 11% vegetation loss. Generated without AI narration.

## Recommended Actions

1. Continue frequent satellite monitoring.
2. Schedule another AI analysis during the next monitoring cycle.
3. Review vegetation change patterns.
4. Prepare forest officials for possible intervention if risk increases.
